

Manni-Plex[®] B Moly

Foliar Micronutrient Supplement

GENERAL RECOMMENDATIONS

CROP	RATE/ACRE	RECOMMENDATIONS
Multi-fruiting Vegetables, Peppers, Tomatoes	1-2 pints	3 applications 7 days apart. First application before first bloom
Fruit Trees	1-2 pints	Apply early spring prior to flowering
Blueberries, Black-berries, Strawberries	1-2 pints	Apply early spring prior to flowering
Grapes (wine, table)	1-2 pints	Apply once pre-flowering
Cole Crops	1-2 pints	Spray after transplanting as needed
Leafy Crops, Lettuce	1-2 pints	Spray at 4 leaf stage, then as needed
Cucurbits	1-2 pints	Apply first application pre-bloom and repeat as needed
Grains	1-2 pints	1 application pre-flowering

MANNI-PLEX B MOLY may effectively be applied with many agricultural chemicals. When used as directed, this product does not supply all nutrients required by plants and is to supplement a soil fertility program based on soil tests. For unfamiliar tank mix combinations sufficient evaluation to determine efficacy and crop safety may be warranted. Avoid tank mixing with phosphate and/or excessively alkaline based fertilizer solutions. Use a minimum 10 gallons of water per acre with ground spray equipment and a minimum of 2 gallons for aerial application. Optimum rate of application will vary depending on your soil properties such as soil pH, organic matter content, soil texture, weather conditions, time of year, general crop health and species. For best results, follow soil test or plant analysis recommendation.

WARNING: Some crops may be injured by the application of Boron. The application of fertilizing materials containing Molybdenum (Mo) may result in forage crops containing levels of Molybdenum (Mo) which are toxic to ruminant animals.

Total Nitrogen (N)	5.0%
5.0% Urea Nitrogen	
Boron (B)	3.3%
3.3% Water Soluble Boron	
Molybdenum (Mo)	0.5%
0.5% Water Soluble Molybdenum	

Derived from Urea, Sodium Borate and Sodium Molybdate. F76

Mixing Instructions

Put 1/3 to 2/3 of total desired water volume in tank. Add adjuvant(s) if desired and agitate until thoroughly mixed. Add pesticide(s) if desired and agitate until thoroughly mixed. Add desired amount of MANNI-PLEX B MOLY and agitate until thoroughly mixed. Fill tank with remainder of desired water. A jar test is a good field practice for evaluating compatibility of multiple chemical mixtures.

Caution: Check compatibility with micronutrient chemical mixtures.

Weight per gallon: 9.9 lbs
Freezing temperature: 32°F
CAUTION: KEEP OUT OF REACH OF CHILDREN

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.htm>

CAUTION: Harmful if swallowed. Avoid contact with skin, eyes and clothing. Causes eye irritation. Avoid breathing spray mist. Wash hands after using thoroughly after using. In case of eye contact, flush eyes with water for at least 10 minutes and get medical attention.

STORAGE AND DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Store in a cool, dry, locked area out of reach of children. Protect from excessive heat or cold. Triple rinse (or equivalent) and dispose of container in accordance with local, state and federal regulations.

Warranty: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use; but neither this warranty nor any other warranty of merchantability or fitness of a particular product expressed or implied, extends to the use of this product contrary to label conditions, or under conditions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.
